If you're reading this, please note;

It gives me immense pleasure to recommend [Student's name] who is a brilliant student of mathematics and throughout her student career at [School/University Name] where I taught her advanced level courses like Calculus and Linear Algebra had the distinction of being one of the top performing students in my classes.

Right from the outset, [Student's Name] has been performing at an astounding level, and has not only grasped all the given mathematical concepts, but has also possessed acute analytical and critical thinking skills. Their performance in my classes has consistently been at the top, achieving [specific grade, e.g., A+ in Calculus] and showing remarkable ability in mathematical proofs and problem-solving tasks as well.

He/she also expressed herself/himself and substantiated with accomplishments outside the classroom by his/her involvement in various competitions and projects in mathematics like the Olympiads at the national level or the math clubs exhibiting inventiveness and perseverance in solving difficult questions. Their ideation and explanation of the solutions is also quite enviable especially because these are important working attributes in the field of research and teaching.

I know that [Student's Name] dreams of excelling in [particular program, e.g., undergraduate mathematics studies or research opportunities that might be able to be available for him/her]. He/she is without doubt a well developed and hard working candidate who has a love for mathematics.

It is with great pleasure that I recommend [Student's Name] to join your program. If you have any further questions, feel free to reach out to me at [Your Email] or [Phone Number].

Sincerely,

Dr. Sarah Johnson

Principal Researcher

Tech Innovators Lab
